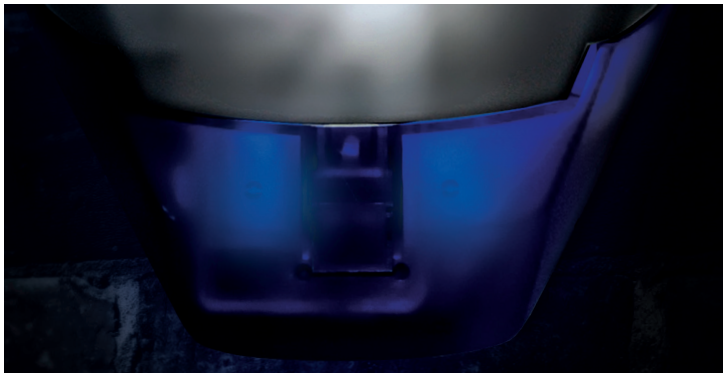
Securing Your Home

Visual & Audible Deterrent

The Deltabell X with optional Lightbox provides a superior visual and audible deterrent day or night. The Lightbox provides supreme lighting to the front of the sounder. Not only that but when an alarm is triggered it will strobe while its twin piezo sounders produce a high decibel warning.

Beat the burglar with tamper protection

This ensures that maximum security is maintained against accidental or malicious tampering of the system. Any sabotage attempts from the front or back, or power supply cut off will result in an activation independently from the control panel.



Status LEDs

The status LEDs flash alternately to indicate the live operation of the bell box. These can also be disabled should you require.

Protected whatever the weather

The electronic components on the printed circuit board are protected by a fully sealed unit with a rubber gasket. This provides added protection in harsh environments and gives you peace of mind that the Deltabell Plus will always sound in the event of an alarm activation.

Contact us today to find out more about securing your property.
